## PROJECTS

### Blog Website

Developed a Full-Stack Blog Platform Using React and Redux

- Built a responsive and dynamic blog website that includes features such as adding, editing, and deleting posts.
- Implemented user authentication with login and signup functionalities, ensuring secure access and personalized experiences.
- Utilized Redux for efficient state management, allowing for consistent and predictable application behavior.
- Integrated backend services for data storage and management, ensuring reliable and scalable performance.

### TO-DO App

Developed a Fully Functional Todo Application Using React

- Created a user-friendly Todo app with features to add, edit, and delete tasks, helping users efficiently manage their daily activities.
- Integrated local storage to persist tasks across sessions, ensuring that users' data is saved even after closing the browser.
- Implemented a responsive design to provide an optimal experience on both desktop and mobile devices.
- Enhanced functionality with features such as task prioritization, filtering, and completion status tracking.
- Focused on performance and usability, delivering a smooth and intuitive user experience.

### Bankist App 📄

This Bankist App is a modern, responsive web application designed to provide users with a seamless banking experience. Utilizing HTML for structure, CSS for styling, and JavaScript for interactivity, the Bankist App allows users to manage their finances effortlessly.

Features:

- User Authentication: Secure login and registration process.
- Account Overview: View balance, transactions, and account details.

- Fund Transfers: Transfer money between accounts with ease.
- Transaction History: Track past transactions and manage spending.
- Responsive Design: Accessible on both desktop and mobile devices.

Technologies Used:

- HTML: Structuring the content and layout of the app.
- CSS: Styling the app to be visually appealing and user-friendly.
- JavaScript: Adding interactivity and dynamic functionalities.

### Image Search App

This is an Image Search App and a proven expertise in developing a sophisticated Image Search App uses HTML, CSS, and JavaScript. Here we explore the world through images with our Image Search App! Powered by the latest Fetch API technology, our app allows you to effortlessly discover and retrieve a vast collection of images based on your search queries. Whether you're seeking inspiration, conducting research, or simply curious, our app delivers stunning visuals at your fingertips. Experience the convenience of quick and seamless image retrieval, all within a user-friendly interface.

### Gym Website

Welcome to our Golden Fitness Website, a dynamic and interactive platform crafted with HTML, CSS, and JavaScript. This website is designed to elevate your fitness experience and provide a user-friendly interface for exploring our fitness programs and services.

Features-

Responsive Design: Enjoy a seamless experience on any device, from desktop to mobile.

Engaging UI: Navigate through our site effortlessly with an intuitive and visually appealing user interface.

Interactive Workouts: Explore interactive workout programs and fitness tips to kickstart your fitness journey.

Customizable Plans: Tailor your fitness journey with personalized workout plans and schedules.

Contact Form: Interested in collaboration or just want to say hello? Reach out through the integrated contact form.

### E-commerce Website - Flipkart

This is a Flipkart-inspired online marketplace! This website, built with HTML, CSS, and Javascript and it offers a seamless shopping experience. Explore a diverse range of products, from electronics to fashion and home essentials, with a user-friendly interface and intuitive design. Enjoy easy navigation, comprehensive product details, and a smooth checkout process for a convenient and delightful shopping journey. Discover convenience and quality right at your fingertips on our platform.
